REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art, Ducheyne et al. teach a controlled release matrix carrier comprising biologically active molecules incorporated within a silica based glass matrix. Ducheyne et al. further teach the controlled release of the active molecule is by diffusion. Ducheyne et al., however, does not teach the claimed silica-xerogel that controls the release of said active molecules only by complete dissolution of said silica-xerogel. The Declaration filed 06/18/07 shows that the present delivery device made of the claimed silica-xerogel does not release bioactive molecules by diffusion, but only by the complete dissolution of the silica-xerogel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 23-31 are allowed.
